

VIOLÍN

Violoncello

The violoncello is a stringed instrument. Its shape is quite similar to the violin, but bigger. It is also made of wood and has four strings. The cellist plays while seated, holding it in an upright position between the legs and rested on a metal spike called the endpin. The cello produces a sound when the bow is drawn across the strings.

VIOLO NCHELO

Violin

Antonio

Vivaldi

Vivaldi was an Italian composer and violinist. He wrote **operas** and **concertos** like his most famous work,

The Four Seasons.
